

Request that the FCC should not implement any proposal that would lesson Indiana's Telephone Privacy Law Protection. Since I have been under this protection I am able to enjoy my evenings and meals without a multitude of telephone calls from people trying to sell me something I don't want or need. If I need something I will go to a store or dealer and see what I can purchase it for. I don't need dozens of calls from people who don't understand "No I am not interested. I think this is one area that should be left to the state government and not try to make it all uniform and less effective.
